Circuit Play

A circuit isn't always a circle! Each design considers a diverse variety of play paths. From ground to deck or deck to deck kids will be able to explore the whole playground in a multitude of ways.

Continuity

Stepping stones, stumps and beams create the perfect path for continuous circuit play in the playground. Kids can utilize these play elements for games like Grounder Tag.

Play Paths for ALL

Our design plan considers a play path for everyone. Kids of all abilities can reach the same events and equipment pieces to provide an inclusive experience for all.

Wave Slide

Kids will be lining up one after the other to go down the Wave Slide! Enjoy a thrilling and bumpy ride while also improving sensory and motor skills. The Wave Slide's one-piece construction offers sturdy build quality without the need for sectional gaps, preventing clothing and necklaces from getting caught.

Challenge Ladder

With the Challenge Ladder, kids will learn to stretch their muscles to get from one play structure to the next. This activity requires children to use their whole body to help them swing from rung to rung. Children will improve their cardiovascular endurance, strength, and coordination while playing on the Challenge Ladder.

CHALLENGING

Octopus Climber

The Octopus Climber by Little Tikes connects playground decks with durable rope cables. A variety of climbing paths allow children to climb up, down, or across to their next play destination. The Octopus Climber facilitates the development of core strength and flexibility, adding several health benefits to this exciting play experience.

ADA TRANSFER

Multi-User Swing

Our Multi-User Swing features a basket style disc and uses the same framing as our Arch swing bays. This group swing incorporates the motion of a traditional swing with the added fun of social interactivity. Children of all abilities can develop their balance, equilibrium, and social interaction while safely soaring!

INCLUSIVE

Ten Spin

Built to accommodate up to 10 kids at once, this popular, freestanding event allows children of all abilities to join in the fun by either sitting, kneeling, or standing. The Ten Spin is an inclusive freestanding product that allows children to play together, while providing an essential sensory experience that supports child development.

Solo Spin

The Solo Spin by Little Tikes utilizes vestibular movement to improve balance, coordination, and perception of gravity. Pretend you're at an amusement park, or training to be an astronaut - there's no limits to what you can imagine. Use it as an independent activity, or get a friend to spin you as fast as they can!

THRILLING

Hypersonic Slide

Our super fast Hypersonic Slide will get kids hearts pumping and keep them coming back for more! Featuring a steep 45° angle, children will gain plenty of momentum as they slide from the top of the play structure and exit onto the playground. The Hypersonic Slide is a two-piece construction with a weather-resistant finish.

Sliding Pole

Provide kids with the unforgettable experience of sliding down a fireman's pole with this fun playground feature. Sliding Poles allow kids to play and grow while getting exercise and building up essential muscle groups. Our Sliding Pole is the perfect diameter for most children older than five to easily grip as they go down.

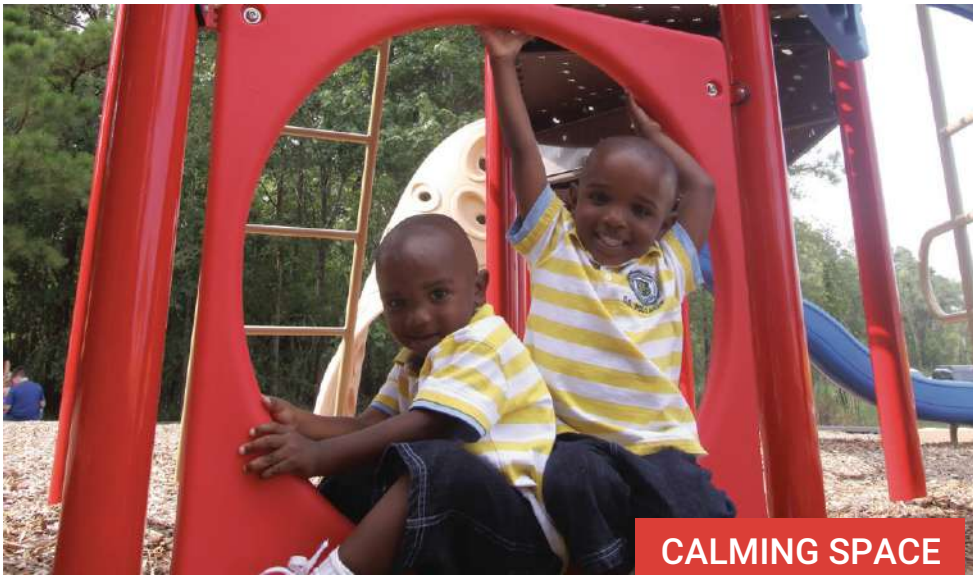

Spiral Climber

The Spiral Climber provides a challenging, twisting climb to the top of the playground. This ground-to-deck climber features multiple pathways to the play structure with its unique spiral staircase design. Kids will test their whole body strength and coordination with the Spiral Climber.

Fan Climber

The Fan Climber is ground-to-deck climber that is a fun alternative to conventional step ladders. Kids will improve their balance and coordination, while maintaining their centre of gravity over their feet. This results in a safer, more comfortable climbing experience, as well as a low-risk way to build perceptual motor skills.

CALMING SPACE

Crawl Panel

Step into another dimension with our Crawl Panel! Whether traveling through a time portal, or escaping through a secret tunnel, there's no shortage of what you can come up with. Our Crawl Panel brings kids together and opens up a world of imagination. Watch as they make new friends on the playground!

SOCIAL

Monkey Lean Out Rail

Imagine this: you're a monkey high up in the trees, looking down at the vast jungle below you. That's exactly what kids will be thinking while playing on our Monkey Lean Out Rail! Use it as an imaginative play element, or as a quiet place where kids can visit with their friends. The only limit to our Monkey Lean Out Rail is your imagination.

SENSORY

Abacus Reach Panel

The Abacus Reach Panel is a sensory interactive panel that encourages hands-on learning, while also teaching fine motor skills. Children will learn important mental math techniques like addition and counting, in addition to the value of numbers, digit positions, and the decimal system. The Abacus Reach Panel is designed at an accessible height for children of all abilities to enjoy.

9 Bar Safety Rail

The 9 Bar Safety Rail with Wheels is a great accent piece to any deck. Children can take a break from physical play as they gather around this exciting feature. The 2 steering wheels provide lots of opportunities for imaginative play. Kids can pretend they are racing each other or driving a police car or firetruck - there's no limits to what they can imagine!

COOPERATIVE

Simon Says Panel

The Simon Says Panel allows kids to play cooperatively. To play this game, spin the coloured wheel, and the image that lands on the arrow shows you what Simon wants you to do. The child that completes the activity first uses the striker to ring the bell. You can also keep score by moving the point stack through the wavy line.

Boingo Drum

Let's create some rhythm with the Boingo Drum! Watch kids explore their motor skills by mastering the various hand positions and movements needed to make unique sounds. This musical piece provides a fun and tactile play experience.

SOCIAL

Nu-Edge Birch Counter Panel

Our Nu-Edge Birch Counter Panel offers children the thrill of playing as a shopkeeper in a magical forest. With its perforated steel construction adorned with branch-like designs, kids will delight in selling rocks, sticks, and other items to their friends with this nature-inspired play panel.

Gear Reach Panel

Designed at an accessible height, the Gear Reach Panel helps to develop sensory motor integration and social interaction. Kids can turn the gears within the panel to make them spin fast or slow, backwards or forwards. The varied gears interlock and help children develop an eye for patterns and relations within their visual environment.

5" Structural Posts
Our 5 inch structural posts, don't sway or flex, and utilize a four-stage paint process, including stainless-steel pre-treatment with super-durable polyester paint that is built to stand up to our winters.
* Smaller posts are utilized for non structural components.

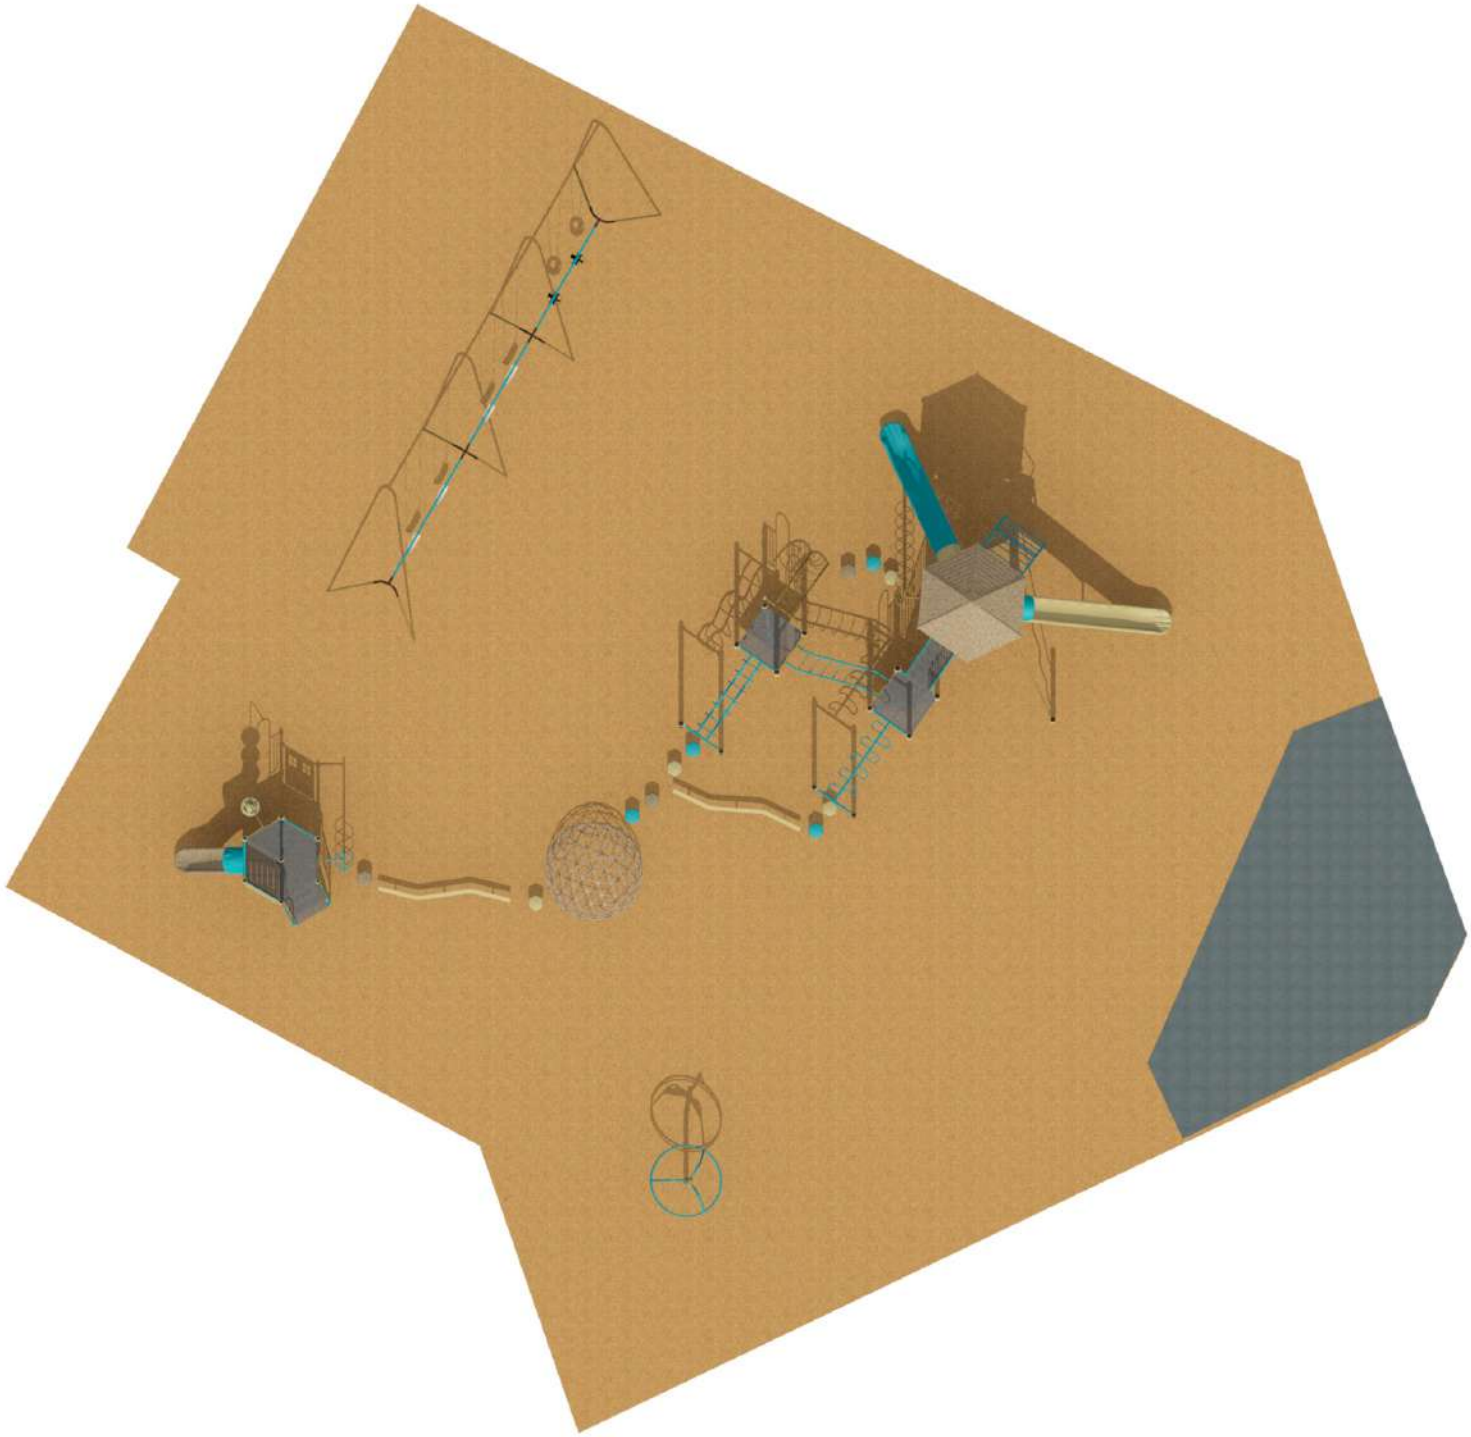

48" Decks Rule!
Large 48 inch decks allow more kids to play at once. Parents can also get into the fun and easily move around the structure.

Play Value is #1
Play is critically important to children's physical, mental and social development, and we take it seriously. Our designers deliver on this vision with components that challenge children's minds and bodies.

Peace of Mind
We stand behind our products with confidence, including a **15-year warranty** on all rigid main play structure plastics, steel and vinyl-coated components.
* Some conditions apply

Circuit Play

A circuit isn't always a circle! Each design considers a diverse variety of play paths. From ground to deck or deck to deck kids will be able to explore the whole playground in a multitude of ways.

Continuity

Stepping stones, stumps and beams create the perfect path for continuous circuit play in the playground. Kids can utilize these play elements for games like Grounder Tag.

Play Paths for ALL

Our design plan considers a play path for everyone. Kids of all abilities can reach the same events and equipment pieces to provide an inclusive experience for all.

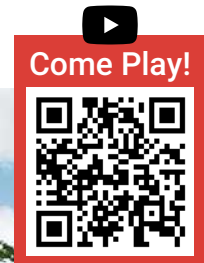

VESTIBULAR

Groove II Slide Vortex

The Groove II Slide Vortex is a versatile piece of playground equipment for children aged 2 - 12 years. It features a one-piece construction, corrosion-resistant finish, and steep drop that will make sure kids gain plenty of momentum as they go down. Kids will be lining up one after the other to ride this fast and thrilling event!

Maypole

Take flight with this tilted wheel! This cooperative overhead spinner is a real thrill for friends. Designed to benefit vestibular development and upper body strength, our Maypole will have kids spinning until they are delightfully dizzy. Friends will love hanging out together on this spinning overhead event—literally!

DEVELOPMENTAL

Stationary Hover Beam

Experience a new level of challenge with our Stationary Hover Beam. Our steel overhead climber provides a unique climb with varied looped handles allowing for different grip positions and movements. Designed with safety in mind, our Hover Beam is constructed with sturdy steel tubing and features our patented Gator Grip for secure gripping during use. Kids will love the excitement and challenge of this overhead climber!

Standard Swings

Swing away the day on our Standard Swings! Featuring anti-wrap bearings, kids will have a safe and secure ride as they swing. Add an extension for an Inclusive Seat or Generation Seat so kids of all abilities can swing together. Our Standard Swings are modular and can be designed to fit your site needs. Available in 6', 8', and 10' heights.

CHALLENGING

Geodesic Climber

Climb to new heights on our Geodesic Climber! This colourful free standing climber is an excellent way to promote social interaction on the playground. Kids aged 5 - 12 will be racing one another to be first to the top. The Geodesic Climber comes in 8', 13', and 18' diameters and has a capacity of 10, 15, and 20 children, respectively.

Wave Walker

Step out of your comfort zone with our Wave Walker! Compared to conventional stairs and bridges, the Wave Walker is a fun and thought-provoking deck-to-deck climber. Kids will have their balance and coordination tested, in addition to building problem-solving skills as they plan each move. Watch as they maneuver from deck to deck!

D10

IMAGINATIVE

Bumper Ladder

The Bumper Ladder offers a fun and challenging way to get to the deck of the play structure. Each bumper provides a colourful step up to the top, while testing kids' upper body strength and four-way coordination. Add a vertical climbing path to your playground with this elevated play activity. Available in customizable colours.

Canyon Climber

Our Canyon Climber is perfect for the adventurous spirit who wants to conquer mountain peaks. This steel climber features strong rungs for scaling up playgrounds and a more challenging vertical path than most climbers. It also provides opportunities for social gathering, interaction, and friendly competition. Multiple kids can climb the Canyon Climber at once, on the outside rungs or through the middle.

CHALLENGING

Curved Loop Climber

The Curved Loop Climber offers a twist on conventional ladder climbers. Its arched design makes kids use all four limbs as they enter the play structure, developing coordination and motor skills. The Curved Loop Climber can accommodate up to 4 children at once, and comes in several heights to mount onto a variety of decks.

Serpent Trek

Conquer and swing across with our Serpent Trek! This exciting overhead resembles a sea serpent's wavy back. Kids will love the challenge and momentum from this overhead climber. Covered in Miracle's patented Gator Grip texture, this overhead event provides a sturdy grip to help kids develop their upper body strength.

DEVELOPMENTAL

Curved Balance Beam

Our Curved Balance Beam helps to improve children's development and balance with its wave like shape and narrow platform. Kids will carefully plan their next move and develop their skills as they navigate along the beam. This equipment piece helps to create a varied circuit with our other balance and linkage events.

Side-by-Side Climber

Our Side-by-Side Climber has enough room for kids to climb together with their friends. This wide ground-to-deck climber features a steady ascent to our Mega Tower playground. With varying levels of challenge children will develop their coordination and strength as they climb to the top.

Sunbury Park
Option 2

D11

Bongo Perch

Add a colourful element to your playground with Bongo Perches! Our Bongo Perches are a simple, yet fun, climber that gets kids to use their balance, coordination, and agility as they cross. They are a great way to add continuous circuit play to the playground by linking smaller play elements to larger structures.

Thruway Panel

IMAGINATIVE

Whether they're entering a space hangar or visiting a friend's house, this angled opening gives children the chance to make an entrance all their own. A doorbell to the side offers a satisfying click, while pin impressions to the opposite side build fine motor skills. Peek-a-boo openings expand social play opportunities while this panel's modern aesthetic compliments any playground.

View Groove Panel

EXCLUSIVE

Elevate your playground with our vibrant View Groove Panel! This sturdy and colourful activity panel not only adds a splash of joy to any play area, but also provides peace of mind to parents and caregivers. Its slotted design ensures kids of varying heights can peek at the world from up high without the risk of falling.

360° Bucket Tot Seat

INCLUSIVE

The 360° Bucket Tot Seat provides an inclusive play experience, allowing children from 2 - 5 years to enjoy the swing set. Children will develop their sensory skills as they perceive their body in relation to gravity, movement, and balance. The 360° Bucket Tot Seat is available with or without a swing chain for an 8' top rail.

Hexagon Treehouse Roof

Shade helps kids to enjoy the playground even on the sunniest of days! Our Hexagon Treehouse Roof creates an attractive canopy over the playground that adds a level of whimsy and even more imaginative play to our Hexagon play structures.

Steel Window Panel

Transform your playground into a world of imagination with our Steel Window Panel! Designed for children aged 2-12, this activity panel adds an exciting imaginative element to playtime. Whether they're playing house or exploring new worlds, children will love this engaging addition to your playground.
