

SOCIALIZE HERE

The City of Delta continues to advance the revitalization efforts in Ladner Village. In October 2024, residents shared feedback on the proposed concepts and features of the reimagined **Chisholm Street Wharf**. To support this initiative, \$4.5 million in funding has been allocated to upgrade the Wharf. In Phase 1, the City heard from over 150 residents and based on the feedback received, we have revised the plans and are now inviting residents to confirm the direction of the final design.

WHAT WE ARE DOING

**Read the full What We Heard Report on letstalk.delta.ca/Ladner-Village*

The City is proposing the following features at the Wharf:

Creation of vibrant and flexible gathering spaces with a variety of seating options, including movable and feature furnishings, designed to support community use and year-round special events such as movie nights / viewing parties, concerts, and craft / farmers markets.

Stepped seating at the base of the Wharf creates a welcoming social space and an easy transition from Chisholm Street up onto the dike, strengthening the connection between the road and the waterfront.

An improved dike pathway / promenade with natural features such as raised planters, shrubs, and street trees, to preserve residents' connection to the Fraser River and environment.

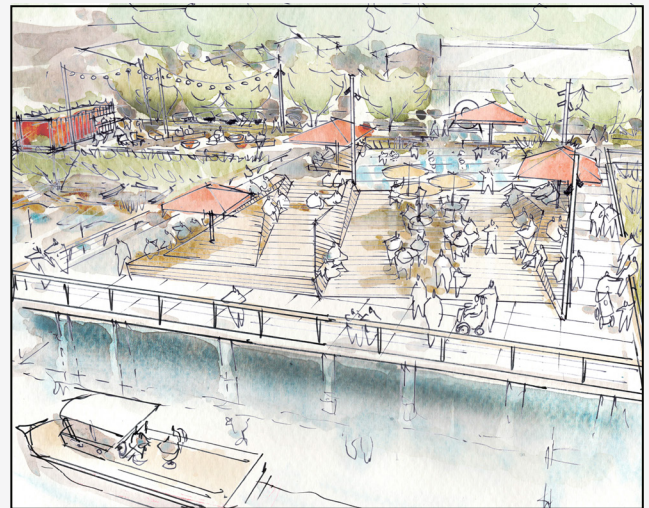

Relief from the summer heat is provided through a playful misting zone that gently sprays upward from the wharf deck, vibrant four-metre-wide umbrellas that add colour and shade, comfortable shaded seating with tables, and strategically placed street trees for additional cooling for stepped seating.

The lighting plan is designed to accommodate projection lighting creating an engaging and distinctive feature at the Wharf, enhancing safety and ambiance while minimizing light pollution.

Pop-up container concession zone will support food and beverage service in a relaxed, inviting setting.

Fully accessible Wharf with durable concrete paving around the perimeter, ensuring safe and easy access for everyone.
